

VENKATA GORAKNATH YADAV BANKA

.NET Full Stack Developer

banka.gorak@gmail.com

+918142164855

Bangalore India

[LinkedIn](#)

.NET Full Stack Developer with ~5 years of experience in **ASP.NET**, **.NET Core**, **Angular** and **Web API**, excelling in building robust solutions and solving complex logic problems in **Agile** environments.

WORK EXPERIENCE

I Accenture Solution Pvt Ltd - So ware Engineering Analyst

06/2023 - current

Bangalore, Karnataka

- Developed and maintained **customer relationship management (CRM)** applications using **ASP.NET** and **.NET Core** for both desktop and web platforms.
- Designed and developed dynamic frontend modules using **Angular**, integrating them with **REST APIs** to deliver responsive and interactive user experiences.
- Reduced response time by 20% and enhanced backend performance.
- Developed solutions for complex **image processing** tasks using **mathematical logic in C#**.
Applied **multithreading** and optimization techniques, including caching and **asynchronous** processing, to reduce response time by 30%.
- Contributed as a key developer in **Agile Scrum** teams during **sprint planning** and estimation, leading to the successful on-time delivery of the 'Umlaut Illustrator' web application project.
- Conducted code reviews and developed documentation for 2+ projects to enhance code quality and maintainability using best practices.

Umlaut Pvt Ltd - Junior Developer

06/2021 - 05/2023

Bangalore, Karnataka

- Assisted in developing and maintaining applications using **C#** and **.NET technologies**.
- Worked on **bug fixing, debugging, and performance issue resolution** to improve application stability.
- Participated in **code reviews and knowledge sharing sessions** to improve coding standards.
- Collaborated with cross-functional teams in **Agile Scrum environment**, attending stand-ups and sprint activities.
- Gained hands-on experience in **object-oriented programming, design patterns, and clean coding practices**

PROJECTS

Project 1 : Umlaut Illustrator – Engineering Illustration Platform (Desktop + Web)

06/2021 -
03/2024

- Developed a cross-platform engineering illustration platform used for designing **high-precision 2D components in aerospace and industrial domains**.
- Built a feature-rich desktop application using **C#** and **.NET Framework (WinForms)** for advanced diagram creation, editing, and rendering.

- Engineered **mathematics-intensive geometric algorithms** to support accurate transformations, trimming, extending, and fillet operations.
- Implemented advanced **image processing features** including grayscale conversion, cropping, erasing, and dynamic JPG compression to optimize file size.
- Optimized application performance for handling **large and complex design files**, improving rendering efficiency and responsiveness.
- Leveraged **multithreading using Task-based asynchronous programming** to enhance performance and ensure smooth UI interactions.
- Developed and enhanced a wide range of **drawing and editing tools**, enabling precise manipulation of engineering diagrams.
- Enabled workflows supporting **2D-to-3D design transformation pipelines** for downstream engineering processes.
- Collaborated in Agile Scrum teams, contributing to sprint planning, estimations, and cross-functional delivery. Maintained technical documentation to ensure scalability and knowledge sharing across teams.

Project 2 : Agile Project Management Platform

- Designed and developed a full-stack web application to manage **agile project workflows**, including task tracking, backlog management, sprint planning, and progress dashboards.
- Built scalable **RESTful APIs using ASP.NET Core**, enabling efficient management of tasks, user stories, and sprint data.
- Developed a responsive and intuitive frontend using **Angular**, improving usability and user engagement.
- Implemented secure authentication and authorization using **JWT tokens and role-based access control (RBAC)** for multiple user roles (Admin, Developer, Manager).
- Engineered features such as **search, filtering, and reporting**, enabling teams to track productivity and project health effectively.
- Integrated **global exception handling and standardized API responses** to improve system reliability and debugging.
- Designed structured database schemas using **SQL Server**, ensuring efficient data relationships and optimized queries.
- Enhanced application performance through optimized API design and efficient data handling strategies.
- Collaborated in Agile Scrum environment, utilizing **Azure DevOps Boards** for sprint planning, tracking, and delivery.

EDUCATION

SRM Institute of Science And Technology - Master of Science, Computer Applications Development

04/2022 - 06/2024

Chennai

Relevant courses

- Data Structures
- Software Methodology
- Algorithms Analysis
- Database Management

SKILLS

- C#
- HTML, CSS and JS
- React and Angular
- SQL
- ASP.NET and .NET Core
- Entity Framework and Web API
- DevOps practices
- Data structures and algorithms
- Object-oriented programming
- Design patterns

ACTIVITIES

- Organized workshops on ASP.NET Core for student communities
- Coordinated multiple events at the university level, focusing on technical skills development
